Mohammed Amine TALHI

+212 679 879 707 Mohammed.talhi@emines.um6p.ma /mohammedaminetalhi /mohammed-talhi

Industrial Management Engineer, Supply Chain major (EMINES–UM6P, 2026), seeking a permanent role in production planning, supply chain or continuous improvement. I turn operating data into practical action plans.

PROFESSIONAL EXPERIENCE

Supply Chain Engineer — Final-Year Project – OCP Group *Ben Guerir, Morocco | April – Sept. 2026*

- Optimized stock reclaiming at the Ben Guerir washing plant and centralized conveyor technical data.
- Built a mixed-integer optimization model in Python with PuLP to schedule stock reclaiming under phosphate-quality and train-deadline constraints.
- On a 134-train schedule, increased trains served from 83 to 104, raising tonnage handled by 25%.
- Built a planning tool that checks results and exports train schedules and projected stock levels to Excel.
- Built a web catalog of conveyor drums with search, technical sheets and spare-parts records.

Engineering Intern – Fluminense Federal University (UFF) *Rio de Janeiro, Brazil | June – Sept. 2025*

- Modeled landslide risk in Petrópolis using weather data.
- Analyzed data from 13 weather stations and addressed class imbalance to improve alert reliability.
- Developed predictive models for landslides in Petrópolis.

Introductory Internship – OCP Group *Ben Guerir, Morocco | June – July 2024*

- Observed phosphate extraction and logistics flows while following site safety rules.

EDUCATION

EMINES – Mohammed VI Polytechnic University *Ben Guerir, Morocco | 2021 – 2026*

Engineering Degree in Industrial Management — Supply Chain Management option

Industrial Visits :

- WELDOM: automated warehouse and distribution flows. – Brecé de Seuil, France
- Rungis Market: fresh-food logistics. – Rungis, France
- ReFood: food-waste collection and recovery. – Chantilly, France
- Stellantis: automotive production flows. – Poissy, France
- Carrefour: supply planning and demand forecasting. – Crépy-en-Valois, France
- FM Logistic: warehouse management and order picking. – Crépy-en-Valois, France

Relevant courses: Optimization and operations research, Production and logistics, Industrial information systems (SAP), Statistics and data analysis, Industrial costing

Groupe Scolaire La Résidence *Ben Guerir, Morocco | 2020*

Baccalaureate – Mathematics A

SOFTWARE

ERP & Planning: SAP S/4HANA (production, purchasing and sales), MS Project (planning), Simul8 (process simulation), @Risk (risk analysis).

Data & Analytics: Python (data analysis and optimization with PuLP), SQL, Power BI, Excel (Power Query, pivot tables, VBA).

Programming: React, Laravel, Java, Arduino.

Engineering & Design: MATLAB, SolidWorks.

SKILLS

Methods: Planning and scheduling, material requirements planning, continuous improvement, process-flow mapping, mathematical optimization, project management.

Interpersonal Skills: Teamwork, communication, organization, autonomy.

Languages: Arabic (native), French (fluent), English (professional, TOEIC 900/990), Portuguese (basic).

Interests: Captain of the EMINES and UM6P basketball teams.

ASSOCIATIONS

Treasurer – EMINES Student Council *Benguerir, Morocco | Mar. 2024 – Apr. 2025*

- Managed club budgets and tracked partnership funding.

Emines Technology Club (E-TECH) *Benguerir, Morocco | 2023 – 2025*

- **2023–2024** – Project lead within the club.
- **2024–2025** – Treasurer and sponsorship lead; managed the budget and partnerships.
- **2023–2025** – Logistics lead for the National Robotics Competition (NRC), UM6P Robotics Competition (URC) and Intelligent Robots' Cup (IRC).

Accommodation & Catering Lead – Engineers Sport Games (ESG) *Benguerir, Morocco*

- Coordinated reception, accommodation and meals for participating delegations.
